Upon completion of this degree from KSU, students will be able to:

Economics majors will be able to analyze equilibria in competitive markets; recognize agents' incentives to optimize; apply relevant resource and technological constraints; indicate how fiscal and monetary policies affect unemployment, inflation, balance of payments, and exchange rates; and evaluate policies that promote long-term economic growth.

Economics majors will express the constrained optimization problems behind consumption, production, and selling decisions.

Economics majors will apply supply and demand and identify equilibria in competitive markets.

Economics majors will indicate the factors that contribute to long-run economic growth and short-run macroeconomic fluctuations.

Economics majors will learn the factors that affect the trade balance and the exchange rate.
